TALK OF COPELAND FOR MAYORALTY RACE

La Guardia and Justice Ford Also Mentioned to Head New York Third Ticket.

By Leased Wire From the New York Bureau of the Post-Dispatch. NEW YORK, Sept. 17 .- Mayor Hylan announced vesterday his intention of returning to private life He did not say when he expected to return and his announcement issued from the City Hall after a conference with a representative of William Randolph Hearst did not foreclose the probability of a third

by Hearst's Evening Journal, a chances are that Hylan will not be Mayor's pronouncement was to turn the discussion in the Hearst and allied quarters to Senator Copeand representative La Guardia and Supreme Court Justice Ford.

The plans call for the develop-ment in the city of a Hearst "Progressive Party" in the hope of capturing the vote which was polled by Senator La Follette during the last presidential campaign.
All men in Tammany Hall have been approached and asked if they would taken minor places on such ticket. Final word to go ahead is being awaited from Hearst in

The Mayor's statement was made te in the afternoon. He said:
"I take this opportunity to thank the many thousands of men and women who kindly worked for and loyally supported me on Primary day. My every effort during my eight years in the Mayor's office has been directed for the people's interest and to give them a clean, decent and progressive govern-ment. I will return to private life with my self-respect unimpaired, my conscience clear and with the satisfaction of having scrupulously lived up to my oath of office."

Statement Indefinite.
In view of the indefiniteness of he last sentence in respect to time, a group of reporters sent word to the Mayor that they would like to have him clear up the ques-

"I will stand on my statement,"

This was supplemented by the declaration of Joseph Moore, president of the Star Publishing Co. (Hearst) who had spent the greater part of the morning in con-ference with the Mayor, that he believed the latter's words were to be taken at their face value.

This has been brought in the name of Senator Copeland. The lenator several months ago anunced that the Democratic party leadership. He is reported by his friends to have his eye on the presidential nomination in 1928, and would like to go to the convention with the support of New York State. Hence, ask the Wearst people what more logical candidate could be chosen for the last desperate assault on Smith?

Copeland's Position.
Cepeland is a writer for the Hearst newspapers. So far as known he has never refused to folow the lead of the publisher. There are reasons for believing he which would be an uphill fight from the start. While he would not have to resign from the Sen-ate in order to become a candidate. he would immediately lose the stamp of regularity to which he might make a technical claim and thereby run the risk of being turned down for renomination.

La Guardia is in a different position. He has told his friends he wants to be an independent candidate for Mayor. He is quite willing to run on almost any sort of a progressive ticket. However, at one point he is out of step with Hearst He is reported as most interested in insuring the defeat of Waterman, while the Hearstites are more concerned with Walker and Smith.

However, there are some of the

UHRIG'S CAVE WAS THE POPULAR SUMMER GARDEN IN 1890

BASEBALL STANDING IN 1890—LOUISVILLE FIRST, BROWNS SECOND

Wins Annual Pikes Peak Race and Smashes All Records!

CHANDLER calls its motor "the Pikes Peak Motor" because it was developed to master Pikes Peak.

Now-once more—this marvelous motor has proved self worthy of the name.

On Labor Day, competing against a large field of contestants, a Chandler with a stock motor won with ease the annual climbing race up the gruelling slope of Pikes Peak—an event sanctioned by the American Automobile Association.

In winning, Chandler shattered all time records. To the cheers of crowds, Chandler swept up the steep ascent with wide open throttle, taking the sharp curves and double curves at thrilling speed—surging to the top nearly a minute ahead of the second car, and nearly three minutes ahead of the third car!

Chandler's time from bottom to summit was 17 minutes, 48⁴/s seconds—the fastest time ever scored on the world's loftiest automobile highway, 14,109 feet above the sea!

Once again has Chandler demonstrated its leadership in performance. To win the Pikes Peak race and set a record required not only a motor of heroic power, but the greatest ease of steering and perfect brake action on sudden, hairpin turns. As long ago as 1922 the Chandler engineering staff went to Pikes Peak to conduct important tests that led to the development and perfection of the present Pikes Peak Motor.

The result is that Chandler power, carburetion, braking, steering and cooling all conform to a standard considerably advanced over the everyday standards of six-cylinder engineering.

Chandler is a car of many records. At Culver City last February a stock Chandler traveled 1000 miles in 689 minutes, breaking all stock car records for such sustained speed with an average of 86.9 miles an hour.

Chandler holds the high gear climbing record on Mt. Diablo.

Chandler holds the climbing record on the Continental Divide, 5084 feet above sea level. Time, 13½ minutes.

Chandler holds the climbing record on Mt. Washington, scaling its dizzy heights in 17 minutes. No other car has ever closely approached this record!

All the new Chandler models are beautiful; distinctive in style; rich in comfort. See them. Get the thrill of sitting at the wheel of a new Chandler and feeling the smooth, quiet-flowing power of the motor that laughs at America's worst hills!

Sixty-two of the bonds were on liquor charges and 38 on gambling charges.

The list was drawn from cases

of persons whose bonds were placed in the hands of the Sheriff yesterlay. In some of the cases no warrants had been applied for; in thers, warrants had been refused. Because of the large number of ersons who are discharged on their onds daily, due to no informations having been issued against them, Judge Gayer yesterday declared that promiscuous arrests by the police were making "a harvest for bondsmen." He instructed the court bailiff to compile the in-

formation about the bonds. CONSIDERS EXAMINATION OF ALL BUILDING CONTRACTORS

Commissioner Christopher to Propose Plan to Assure Greater Safety in Buildings.

Building Commissioner Christo-pher said today that he is considering a plan whereby building contractors would be compelled to pass a general examination before being permitted to engage in construction work in St. Louis.

"Plumbers and other tradesmen must pass a test," he said, "in the interest of preventing incompetent men from doing the work for citizens. There is no examination required of building contractors, however, and the public has no assurance of their competency other than by reputation. Improperly constructed buildings may cause accidents or at least result in monetary losses and an examination would lessen this danger."

Christopher said he had not considered what steps were necessary to enact such a law, but would take it up shortly with others. GREEK IMMIGRANT GIVES

LE BUNDY ESTATE \$690,000 "Emperor of the Sahara" Was
Shot By Wife in 1919.

By the Associated Press.
MINEAOLA, N. Y., Sept. 17.—

Jacques Le Baudy, eccentric "Em-peror of the Sahara," who was shot by his wife in his Westbury, L. I., home in December, 1919, left an estate of \$690,000 in the United States, according to a final accounting filed by the administrator. The gross value of the estate may never be definitely ascertained, the report said, because of the wide distribution of the property and the many litiga-tions involved. Suit recently was instituted against the French Gov-ernment to recover \$5,000,000

worth of property. Le Baudy arrived in New York in 1907, where his many eccentricities brought him continually in the limelight of the press and twice in the insane asylum. Following his death his estate became the subject of litigation between his heirs. His wife and sister were the chief beneficiaries. Mrs. Le Baudy later married Henry Seaudreau, father of her daughter Jacqueline's husband, Roger 3oth couples now reside in France.

SUPERB piece of cabinet work, shapely, compact, in harmony with home and air, the ideal radio receiver for living-room table-the New Magnavox Model 10.

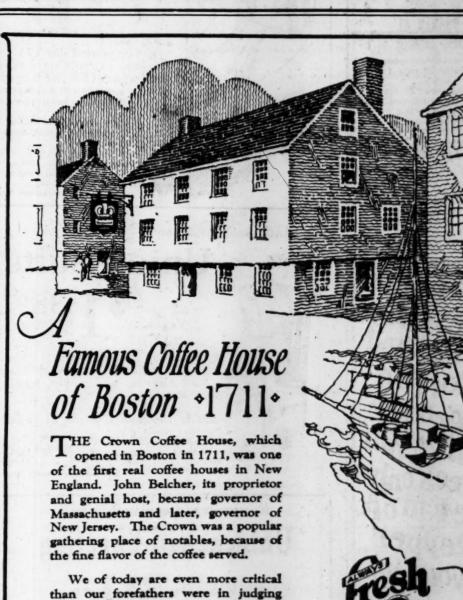

Skilled wood workers created the case—the famous Magnavox engineers, the men who in 1906 made the first successful radio telephone in the world, and received the first radio applause card ever mailed, built the receiver. The New Magnavox is good to look at and amazingly easy to operate—a flick of the fingers—the turn of a single dial—makes you master of the air.

No more fumbling over a group of dials with this New Magnavox Receiver—the Magnavox Single Dial Control makes radio tuning so simple that a little child can bring in stations just as clearly as an expert.

AUDITORIUM UP TO PEOPLE, MILLER SAYS

Mayor Declares Aroused Public Sentiment Is Necessary to Rush Structure.

Mayor Miller, in an address to day before the board of directors of the St. Louis Convention and Pubicity Bureau at the Mayfair Hotel, said it would take from four to six wars to complete the municipal autorium provided for in the bond issue unless public sentiment crystalized in favor of intensive effort toward its completion at once.

He pointed out that the Board of Aldermen had twice pigeonholed bills designed to speed up the work of condemnation. If Aldermen became convinced three was a general demand for the auditorium the Mayor said, work could be in-

The auditorium is to be erected on the block just west of the Mu-nicipal Courts Building, bounded by Fourteenth, Fifteenth and Market streets and Clark avenue. Mayor Miller said there were 154 separate parcels of property on the block and that titles must be investigated and the property condemned before work could be begun.

Socrates: I was sorry not to see any of you last night at the agora. We were discussing the foreword to Leon Trotsky's and before we got done with it we had a somewhat spirited time.

Glaucon: Did you agree with him that we are making our own revolutionary propaganda and need have no fear of Russia or anyone else adding anything to it? Socrates: Well, the debate got to the point where they were kind enough to ask me

Thrasymachus: That is usually the case. Socrates: I think it amounts among twostory thinkers to bringing the argument downstairs in some concrete form where anybody can see it. It may be true, as somebody has said, that thinking has been

declining in the world for 800 years, but I wouldn't say from what Trotsky says in his foreword that it is entirely dead. Certainly we are witnessing in England a spectacle without parallel in history. Blinking the truth is going to do us no good. We feel, of course, that nothing of the sort could happen us; but how little England expected it but a short while ago! Polemarchus: Jove, yes Socrates: What everybody at the agora

wanted to know is what we can do about it I don't think anybody relishes the thought such a condition as England finds herself in. It was in the expectation that I might have something to suggest that the assembly was kind enough to call for Socrates. I had no hope that anyone would believe what I felt like saying. No doubt people in England said the same thing years ago. We lack, just as Wellsius says. the faculty to foresee what lies ahead and doing something to avert it. It makes not the slightest difference what we feel about We still must know, if we know anything, that the same excesses which have brought England to her knees are being practiced upon an even greater scale in our own country. Trotsky says Wall street will do all that is necessary to bring us to the same pass, and if there is anyone who doubts this the class in history is shy a pupil.

Glaucon: That is, you think our own economic empire will succeed the British and in time fall of its own weight. Socrates: Of course if will. Imagine the

etructure created by England. Does it differ in any respect from those created by all the old empires of history? Polemarchus: Of course not.

Socrates: Are we not obviously, just as rotsky says, the successors to what England had, and is not her power passing to as as surely as Rome took over the powers of Greece?

Thrasymachus: Certainly. Socrates: Very well. What can we do bout it? Nothing at all. We don't believe it, and therefore will do nothing to prevent England did not believe it, and therefore did nothing to prevent it. Wellatus wrote the outline of history in the belief that if we could look back upon the way we have come we would profit by our experience. Nothing of the sort happened. We insist upon going our own blind way and making our own mistakes. That is what all people have insisted upon, and it is why empires rise and fall. These is no difference from an historical standpoint between the Emperor Trajan conquering Dacia for her mines, England imposing her authority upon India for the wealth of the East and the United States branding all other nations with the dollar mark as if they were so many cattle. Trouble with the drys is that, like the Godwin-Shelley brand of enthusiasts of a century or more ago, who rhapsodized over the human perfectibility, their expectations are far and away too extravagant; human nature simply can't stand the strain of their demands. This would make liquor as free as water, which will take the profit out of it and the damnable busi ness of bootlegging and drug store graft will be over. Redecorating Hint

This simple, inexpensive purchase will make your whole home prettier

TERE'S the most practi-T cal, most sensible thing you can do to make a "new' home out of your present dwelling place: cover your old scarred floors with an Armstrong floor of cheerful color and intriguing design. It's being done in the smartest homes by prominent decorators.

It's a happy task, too

Just as you select your draperies, you choose a pattern of Armstrong's Linoleum to suit each room: a daring Handcraft tile for the sun porch; a striking colored inset tile for the hall; perhaps a richly rippled Jaspé for the living-room; a quaint arabesque or Florentine mosaic for the bedroom. And within twenty-four hours the floors can be laid. No tacks, no brads-cemented firmly in place over a foundation layer of builders' deadening felt. The finished floor is free from ugly cracks or gaping seams. It's a lustrous surface, a comfortable surface; one that needs no scrubbing to keep brightly clean.

There's color, pattern, smartness to these new floors of Armstrong's Linoleum. Cost but a trifle - yet

Inlaid Tiles, Geometrics, Mosaics Plain colors, too. Over 170 strikingly beautiful inlaid patterns. An Armstrong Inlaid is inlaid from the tough burlap back to the fade-proof surface. At the left: Armstrong's Jaspé No. 15.

Even lower in price - Armstrong's Printed Linoleum. The same wear-proof body as Armstrong's Inlaid Linoleum but with the bright patterns printed in heavy oil paints on the surface. A wide range prettiest patterns ever. At th

at 1730 Missouri avenue, at 5:30 p. m. yesterday, Roy A. Friend, a la-borer, found a note signed by his wife, Elizabeth, which read: "Roy, I am sorry this has to happen, but we can't get along. I tried my best to make you happy." A short time later Mrs. Sophie

TOKIO, Aug. 16.—The tomb of Sharaku, one of the most ramous caricaturists in old Japan, whose humorous pictures of the actors of his day are treasured by lovers of art, especially in Europs, is reported to have been discovered in the Hongyoft Temple, Tokushima, by Dr. Ryuzo Torii, the noted anthropologist, who is now staying there investigating ancient relics. The whereabouts of this tomb has here-tofore been one of the interesting problems for artists, and for Sharaku experts in particular.

America Will Not Stop Seeking Conquest of the Air

ESPITE THE LOSS of the giant dirigible Shenandoah with its appalling loss of lives, despite the failure of the naval seaplane to complete its non-stop flight to Honolulu, with the final and dramatic rescue of the crew, "Americans are not going to give up the task of conquering the air," insists the Buffalo Evening Post, and this resolve finds endorsement in many editorial utterances throughout the country.

"It is not the American way to give up in the face of defeat," declares the Savannah News which is confident that the failure of the Pacific flight and the loss of the big airship will not prevent our Government from continuing its experiments with both heavier-than-air and lighter-thanair flying machines. The men who fell to death with the Shenandoah, the Albany Evening News reminds us, "believed in the future of aerial navigation, were willing to risk their lives in pioneering, and would not have America say 'stop'" The Atlanta Journal declares that, "sacrifice for a 'vision splendid' is never unavailing, and the blood of those who fall in battle for the skyways will become in truth

the seed of ultimate victory."

But while public opinion, as reflected in the press, does not seem in a mood to approve any panicky retreat from the field of aviation, neither does it seem content to ignore the problems raised by the Shenandoah disaster. The demand for a full investigation of our naval and military air policy has been brought to a head by Col. William Mitchell, deposed assistant chief of the Army Air Service, who invited courtmartial by his sensational charges against the War and Navy Departments.

It is not only in this country that our experiments in aviation are exciting intense interest, for the Shenandoah disaster created almost as great a sensation in Europe as in the United States.

In this week's "Literary Digest" you will be able to understand the trend of American public opinion on the subject, you will sense the problems that have arisen and which will undoubtedly come before Congress. The story as told in "The Digest" this week makes vastly entertaining reading.

British Thrust at American Religion

A slam at American religion by The Church Times, the leading "Anglo-Catholic" organ of the Church of England in London, is keenly resented by The Living Church (Milwaukee, Wis.), recognized as representative of the High-Church wing of the Protestant Episcopal Church in the United States. The Church Times in a two-column editorial characterizes American religion as Puritanism that has allied itself with

Capitalism. "This American Puritanism," we read, "with its Calvinistic tradition and Methodist emotionalism, has probably been less affected than any other form of Christianity by modern ideas. Like the old Calvinists it still holds that God is chiefly glorified by hard work and money-getting, and that to restrain social pleasure is a sacred duty."

Read both sides of the controversy in this week's issue of "The Literary Digest."

Why That Lame,

Achy Back?

Is a bad back keeping you miserable? Do you get up lame and stiff; drag through the day tired, weak, nervous and depressed?

Then you should know that these ills are often due to faulty kidneys. Once the kidneys fail to rid the blood of impurities, there's a slow poisoning and upsetting of the whole system. Constant backache is apt to follow, with rheumatic twinges, headaches, dizziness and annoying bladder irregularities.

If you have reason to suspect your kidneys, use Doan's Pills. Doan's are for the kidneys only. They are recommended the world over. Ask your neighbor!

'Use Doan's," Say St. Louis Folks:

ADAM SCHMIDT, prop of barber shop, 2004 Shen-andoah av., says: "There was a pain over my kid-beys and when I bent over it was hard for me to get pagain. This soon broke my rest and I was all tired out. Several boxes of Doan's Pills from Fischer's Drug Store drove the trouble away."

MRS. WM. ESICA, 1616 S. 13th St., says: "Rheumatic twinges darted through my kidneys and the misery in my back never let up. My nerves were on edge all the time and I was so weak and worn out I had a hard time to do my work. My kidneys were disordered. After using four boxes of Doan's Pills my kidney trouble was put to an end."

MARY.—We do not know what might be the largest salary you could receive as a milliner or saleslady in a French room, as this would depend largely upon the firm for which you work and upon your own ability. You might get a position as assistant to a window decorator and learn the business in that way.

CHAPTER 19. Advance and Retreat,

In vain Greville, not daring to write his indignation at the Embassy arrangement, shot little shafts of caution and warning. They were unheeded. sweetly laughing, sweetly speaking, was beside him and letters were trifles. He persuaded himself that Greville had never understood her and that he did; mere conjectures then might be put smilingly aside.

Sir William thought, but did not retort, that Greville's utter lack of idealism entirely unfitted him for judging an inspiration like Emma's; that-oh, fallacy of lovers!-the body might be debauched and dragged through the mire and the white maiden soul sit smiling secure in its fastness. That rse, in Emma's case, hers only. At such a possibility for any woman he himself would his sweet sake. Indeed, her proghave laughed with Greville. His replies evaded those points that were full of real anxiety as to her happiness. Did Gre-ville believe her faithful heart could ever change from its devotion to him? What could be done to wean her from that hopeless passion? It was clear there could be no hope for any other man unless it disappeared. and he was sure that the shock when she knew the facts would be dreadful. Greville, horrified at her being so seriously taken, wrote back under the difficulty that his praises of Emma now recoiled on himself. If he had dwelt on her absence of coquetry, her freedom from giddiness, her strong good sense, how was he now to convey the caution that she was merely a woman of easy virtue and the more dangerous became of her extraor-dinary attractions? He felt himself involved in contradictions but did his best. And first he reassur-

But since she has not survived in history save as a possible example to Emma, and be granted that the two ladies had perhaps very little in common that Emma could not have been a Wells with all her efforts. She did, at one time, try her best and failed. It is also an odd reflection that Greville himself, the great, the highly descended, remains in human memory solely because Emma once dwelt in his house in Edgware Row on her way to more celestial spheres. So incredible to Greville-minds are the impish freaks and caprices of that Muse of History whom the beautiful of History whom the besotted an-cients treated with as much ven-eration as if she had been a sen-

Greville's motives and contradictions were perfectly clear to him, and the more confirmed his belief that Emma was a soul unspoilt. He accordingly proceeded to do his best to spoil her. Every day was devoted to her interest and amusement.

How can I with any selfrespect enter the Palazzo Sessa when I am told there is a young girl there unconnected with the family, extremely young and beautiful, with the manners of an actress, and who has been presented only to your male friends? The hot sun beat on the jalousies and filtered through the blinds. The room was, however, dim and cool with shade and the rich perfume of flowers and there was no external cause for the little elderly flush which colored Sir William's cheeks. I am such a believer in the beauty which comes through exercises designed to build up firmness and strength that I hate to see many young girls today who do not know the value of exercise.

It is true that the modern girl is much more athletic than the girl of a generation ago. It is true that the girls of today who do go in for exercise are noted for their agility and strength. The ones who try various indoor and outdoor stunts, whether it be work in a gymna-sium or golf or riding or tennis, soon grow to love these sports and to feel out of sorts if they do not get their accustomed exercise.

Now I recently heard a foolish girl say that she hated to acquire the habit of exercise, because she knew that once she acquired it she would miss it so when she did not

RUBBER-PROTECTION beyond Price

ESPITE the unprecedented rise in the cost of raw rubber, the name "Kleinert's" will continue to appear only on articles of pure rubber.

Absolute protection in Dress Shields, Sanitary Aprons, and Baby Pants is worth more than any possible consideration of price.

Cheap substitutes, made of adulterated rubber, are dearer in the long run. They leave you without that precious sense of security which always belongs to the woman who relies on Kleinert's quality.

For nearly half a century Kleinert's quality has not varied-and it never will.
